Introduction

NFTs are at present taking the advanced digital arts and collectibles world by storm. Digital artists are seeing their lives change thanks to gigantic arrangements to a new crypto-swarm. In addition, huge names are partaking as they spot one more opportunity to connect with fans. Anyway, digital art is one of the moving strategies for using NFTs and they can be used to address responsibility for one of a kind resource, like a deed for an item in the digital space.

What's an NFT?

NFTs are tokens that we can use to represent ownership of items. They let us tokenise things like digital arts, collectibles, even land. They can have each official proprietor in turn and they're gotten by the Ethereum blockchain. NFT art is a digital asset that is collectable, unique, and non-transferrable, Cortes explained. Every NFT is unique in its creative design and cannot be duplicated, making them limited and rare. NFTs get their value because the transaction proves ownership of the art.

"You can sell anything digital using NFT. Virtual Mavs gear, sneakers, art, pictures, videos, experiences, anything our imagination can come up with."

—Mark Cuban on NFTs

NFTs are carefully remarkable as no two NFTs are the same. Content creators can sell their work anywhere and can get to a worldwide market. They can also hold proprietorship freedoms over their own work, and guarantee resale straightforwardly. Things can be utilized in astounding ways. For instance, you can involve digital arts as security in a decentralized loan.

An NFT can have only one owner at a time. Possession is overseen through the unique ID and metadata that no other token can reproduce. NFTs are minted through smart contracts that allot possession and deal with the adaptability of the Nft's. At the point when somebody makes or mints an NFT, they execute code put away in shrewd agreements that adjust to various norms, for example, ERC-721. This data is added to the blockchain where the

NFT is being made due. The minting steps, from an undeniable level, has the accompanying advances that it goes through:

- Making another block
- Approving data
- Recording data into the blockchain

NFTs and Ethereum tackle a portion of the issues that exist in the web today. As everything turns out to be more computerized, there's a need to repeat the properties of actual things like shortage, uniqueness, and confirmation of possession. Also that computerized things frequently just work with regards to their item. For instance you can't exchange an iTunes mp3 you've bought, or you can't trade one worker buy-in's focuses for another stage's credit regardless of whether there's a business opportunity for it.

Technology: Why blockchain?

Blockchain technology empowers self-sovereign organizations, upholds straightforwardness and makes more raised degrees of efficiency through automation; it can without a very remarkable stretch be green, practical and open to everyone — if we really want it to.

About Joesapes NFTs

What is Joesapes Nft?

Joesapes (Japes) is a collection of 99 Ethereum-based non-fungible tokens (NFTs) that launched in 2022. These Ape NFT caricatures feature various facial expressions, clothes, and unique elements.

Our Mission

To give digital ownership and utility of unique and rare NFTs with a lasting connection.

How many Joesapes NFTs will there be?

- A total of 99 ethereum-based NFTs will be released
- Only one edition of each unique piece
- Each collection has the same theme and concept

What can I do with my Joesapes NFT?

Owning a Joesapes NFT comes with full copyright claims and user sovereignty over the public key it is tied to. What this means is that any

Joesapes holder has the absolute right to use it as they see fit; from profile pictures to the choice of auctioning it out for sale. A holder can also stake them and earn passively on them.

How to get started

- **Set up your wallet**

Once you've set up your wallet of choice, connect it to Joesapes by clicking the wallet icon in the top right corner

- **Buy your art**

Browse through any arts of your choice and Bid for your collectibles which will be sent to your wallet address if you have the highest bid at the end

- **Sell Your NFT's**

Choose between auctions, fixed-price listings, and declining-price listings. You choose where you want to sell your NFTs to.

Features of Joesapes NFTs

- **Unique:** Every piece of Joesapes NFTs contain within a code information that describes their properties which makes them different from others.
- **Traceable:** Each Joesapes NFT has a record of transactions on-chain, from when it was created as this is very important for owners and prospective buyers.
- **Rare:** To ensure that each Nfts remain desirable in the long run, every piece of Joesapes NFTs is rare.
- **Indivisible:** Joesapes NFT cannot be transacted as some fractions from the whole.
- **Programmability:** Like all traditional digital assets and tokens built on ethereum smart contract blockchains, Joesapes NFTs are fully programmable.

Roadmap

Phase 1: Begin smart contract, marketplace development, Community Management initiatives, and Execute partnership agreements

Phase 2: Pre-Marketing Campaign, Art Reveal, Joesapes NFT Presale

Phase 3: Increase Marketing efforts, Launch Collectors Club
